

Boston Colonial Pavers®

IDEAL CONCRETE BLOCK COMPANY, INC.

Boston Colonial Pavers®

INTRODUCTION

The traditional shape and finish of Boston Colonial Pavers are timeless in style and popularity. From the look of classic New England architecture to the sophisticated appeal of modern contemporary design, the lasting beauty of Boston Colonial Pavers will complement and enhance your landscape environment.

Boston Colonial Pavers are available in a full palette of rich, distinctive colors authentic to New England. Please refer to our *Come Home to Style* catalog to view the wide array of eye-catching colors we offer.

COMPOSITION & PERFORMANCE

Boston Colonial Pavers are made by blending pure iron oxide pigments with a rich concrete mixture. Utilizing extreme pressure and vibration, specialized equipment molds this special mix into high-density concrete pavers with exceptional strength and durability.

Boston Colonial Pavers are dimensionally accurate, have distinct beveled edges and offer a slip-resistant surface. When properly installed, they interlock to form a strong, segmental pavement capable of withstanding heavy loads. Boston Colonial Pavers are suitable for residential, commercial and municipal applications. Typical uses include walkways, driveways, patios, pool decks, sidewalks, plazas, parking lots, cross-walks and low-speed vehicular roadways.

PHYSICAL CHARACTERISTICS

Boston Colonial Pavers meet or exceed North American industry standards, including the requirements of ASTM Specification C 936 for Solid Concrete Interlocking Paving Stones and CSA Standards for freeze-thaw performance. Our strict quality control ensures consistent strength, color and size.

Nominal Size/Coverage	4" x 8" (100 x 200 mm) • 4.5 pcs/sf
Thicknesses	2 3/8" (6cm) 3 1/8" (8cm)
Compressive Strength	8500 psi minimum
Water Absorption	5% maximum
Freeze Thaw	No Effect
Slip Resistance	Excellent to ADA

TECHNICAL SERVICES

Please call our offices today for complete technical information and literature. We also offer design consultation, specification assistance, and job-site quality review upon request.

INSTALLATION & PATTERNS

Please see our *Contractor's Guide to Installing Interlocking Concrete Pavers* for guidance on installation.

Boston Colonial Pavers can be installed in a number of interesting patterns, including herringbone, running or stretcher bond, and a variety of basket weave designs. Herringbone patterns are recommended for vehicular traffic or heavy loads due to superior interlock. For residential driveways and other light-duty applications, Boston Colonial Pavers may be installed in running bond or basket weave patterns. Stack bond patterns should only be considered for pedestrian areas. Boston Colonial Pavers are also popular for use in a soldier or sailor course as a border for other paver shapes.

90° Herringbone

45° Herringbone

Running Bond

Running Bond Head On

Whorling Square w/ cut 4x4

Herringbone Variation w/ cut 4 x 4

A white deposit known as efflorescence may appear naturally on any concrete or masonry product. It does not effect the structural integrity and will dissipate over time. Efflorescence is not indicative of a flawed product. For more information, ask for Ideal's Efflorescence Advisory.
