

BOXED BEAMS

THE WOOD BEAM, REIMAGINED.

Have the beauty of reclaimed wood beams without the weight. These hollow beams can be fashioned and faced with reclaimed lumber offering a lighter, more versatile beam for a variety of structures with easy installation.

VERSATILE + BEAUTIFUL

With no wood inside and the ability to shape over existing structures, boxed beams are great for many applications and look like regular beams.

All you need are your specs. Our boxed beams can be made to whatever width and length is needed (seams will be present every 7'-8' depending on length).

RECLAIMED OAK

Engineered Boxed Beam
Original or Smooth Surface
Unfinished or Prefinished

NEW WHITE OAK

Engineered Boxed Beams
Live Sawn
Unfinished or Prefinished

Each Side is $\frac{3}{4}$ " thick

A MORE SUSTAINABLE OPTION

Our Boxed Beams are a sustainable and green option because they're made with less wood!

They look just like full sawn wood beams from every angle. You can put these beams on anything - steel, older beams that need a facelift, PVC... the options are endless!

Paper and ink limitations of color samples as well as influence from heat, light and printing may account for differences in actual color.
